Does walmart pay for rosetta stone

Activate and hold the button to confirm that you're human. Thank You! Try a different method The message recorded on the Rosetta Stone isn't as significant as the languages in which it's written. The stone is dated March 27, 196 B.C., and is inscribed with a decree from Egyptian priests endorsing the pharaoh as a good, humble ruler and respectful worshipper of the Egyptian gods [source: BBC]. Written beneath the decree is a mandate on how the message should be shared: Clearly, the priests wanted to get the word out because they ordered that it be written in three languages and carved into stone.In itself, the Rosetta Stone is no more remarkable than the other stelae of its time. But its preservation helps us to understand Egypt's past as well as shifting powers during the Greco-Roman period when Egypt was ruled by the Macedonians, Ptolemies and the Romans. The pharaohs, of whom Cleopatra was the last, would be succeeded by Coptic Christians, Muslims and Ottomans from 639 to 1517 A.D. [source: BBC].These fundamentally different rulers caused changes in all aspects of Egyptian life, and the most apparent evidence of these changes can be found in the written language. New rulers brought new religions, and the old gods were replaced by new ones. As a result, the most sacred of all writing, hieroglyphics, was replaced, too.For centuries, Egyptians recorded their history in hieroglyphics. Hieroglyphics were sacred characters reserved for religious or governmental mandates. The language was used to inscribe tombs, temples and other monuments. Because hieroglyphics was such an intricate and sacred language, the Egyptians developed hieratic, which was like an abbreviated version of hieroglyphics. Hieratic was used to record some governmental decrees and business transactions, but it wasn't used for sacred purposes.By the Ptolemaic Period, when the Rosetta Stone was inscribed, Egyptians had turned to Demotic -- an even more simplified version of hieroglyphics. When the priests commissioned the decree on the Rosetta Stone to be written in three languages, they ensured that all of Egypt would be able to read it [source: Harvard].And until the fourth century A.D., the Rosetta Stone was perfectly readable. But as Christianity became more widespread in Egypt, hieroglyphics was abandoned for its association with pagan gods. Demotic wasn't a taboo language like hieroglyphics, but it eventually evolved into Coptic. Coptic was based off of the 24 letters in the Greek alphabet as well as a few Demotic characters for Egyptian sounds that weren't represented by the Greek language.When Arabic replaced Coptic, the last frayed thread to hieroglyphics finally snapped. More than a thousand years of Egyptian history became lost in translation. Egypt made way not only for a new language but also for new politics and religion. The sacred temples inscribed with hieroglyphics no longer had any meaning for the Egyptians or their new rulers, and they were stripped bare and demolished to obtain raw material for new buildings. Among this rubble was the Rosetta Stone, which was rebuilt into a wall.The Rosetta Stone would later be resurrected as that civilization came down and a new one erected in its place. Only then would its significance be realized. In the next section, we'll learn about the events leading up to the Rosetta Stone's discovery and the lucky accident that revealed the stone. Co-Authored By: Portal-God Staff Editor Image Credit: krlolkhlm/Stock/GettyImages If you're a Walmart associate interested in earning an undergraduate degree online, you can likely take advantage of Walmart's tuition assistance through the Live Better U program. As of August 16, 2021, the company started paying fully for associates' textbooks, fees and tuition and eliminated the \$1 a day fee previously required. Walmart also expanded its partnerships with new universities to make more programs available. How Walmart's Free College Works Walmart's Live Better U program uses the education platform called Guild Education that has collaborated with several universities to offer associate's and bachelor's degrees online. Walmart advertises that associates can choose from more than 30 degree programs and study in job-relevant fields, such as supply chain management, technology and business, while the company picks up the costs. There are also several trade skills programs offered. University of Arizona Voxy EnGen University of Denver Pathstream Purdue University Global Wilmington University Johnson and Wales University Penn Foster Southern New Hampshire University Brandman University All programs are entirely online so that associates can study at their own pace, though they do need to keep up with the course requirements. Learning coaches are available to help you juggle the challenges of school and work as well as plan your educational path to fit your goals and schedule. There's no waiting period to qualify for Walmart's tuition assistance program, so you can enroll as soon as you start working. As long as you're not a temporary worker who won't qualify at all, you'll have access to this benefit whether you work part-time or full-time. While all eligible hourly associates will qualify, salaried workers can only do so if they're not market level or higher. Walmart's public portal doesn't mention anything about a required number of credits you'd need to take or a required grade to earn. However, schools may have their own requirements that they'll disclose during the enrollment process. Keep in mind that plenty of other employers also offer tuition assistance programs and may be an option for you if you're not a Walmart employee. Limitations of Walmart's College Assistance While Walmart's program goes a long way toward helping associates get a college education, it does have some limitations. For example, you can't use the program to earn a master's degree since it only covers undergraduate programs. Further, if you already have a bachelor's degree, you can't take advantage of Walmart's college program. You'll also need to consider the limited selection of colleges and degree areas since there's a chance the program that interests you may not be covered. Taking Advantage of Walmart's Tuition Assistance If you're eligible for Walmart's program, you can visit the company's subpage on the Guild Education website to find a button to get started. You'll log in with your Walmart employee credentials and be able to explore the degree programs available to you, speak to a coach to get program suggestions and apply to your desired program. Note that you'll need to meet any additional requirements for the school and program required such as having the minimum required grade point average, showing proof of finishing high school and submitting transcripts. Once you get approved for Walmart's program and the degree program you applied to, you can expect to learn when you'll start classes and get the necessary textbooks. You'll take your courses online and submit work according to the schedule set by your school until you complete the required number of credits to graduate. Keep in mind that plenty of other employers also offer tuition assistance programs and may be an option for you if you're not a Walmart employee. For example, Amazon will cover as much as 95 percent of your fees and tuition. Target has followed Walmart in offering free undergraduate programs but even covers \$10,000 a year for master's programs. Also, Arby's employees can get \$5,250 to \$6,000 annually for college tuition, and even family members can get \$2,500. Activate and hold the button to confirm that you're human. Thank You! Try a different method CC0/mojzagrebinfo/Pixabay The thought of purchasing items online using your bank information can seem scary, especially with the rise of security breaches and hacking. Fortunately, there are multiple ways you can purchase things online with relatively little risk. When you do choose to shop online, make sure you're shopping on a secure, reputable website. You also want to make sure the URL to the website starts with the letters "HTTPS" and shows an icon of a padlock to the left of the web address, which indicates it's a secure server. Once you're done browsing, consider using one of these payment forms to complete your purchase.Debit CardOne of the most common ways to pay for something online is to use your debit card that's linked to your bank account. This method can be risky though, so you should exercise caution when you choose to use it. When you use a debit card over other methods of payment, you're putting yourself at risk of being phished and having someone steal your account information because you aren't protected against fraud as thoroughly. This is especially true if the online account you're paying through stores your card information. If debit is your only option, it's simple to select your items, proceed to checkout and enter in your debit card information. Once all the necessary fields are filled in, you're able to submit payment and finalize your order.Online Payment CompanyOnline payment companies, such as PayPal, Stripe, Due and Square, can be a lot safer than using a debit card that's linked right to your bank account. These methods keep your bank account information private, preventing phishers from accessing that information. Many of these companies have applications you can download on your phone and/or tablet, making it easy to keep track of your purchases or make them on the go. Programs such as PayPal are free to use and don't have any monthly maintenance fees that a bank normally does. Even though these types of companies are more secure, you should still use caution and keep an eye on your account, checking for any signs of fraudulent activity.Credit CardCredit cards typically have more protections in place for keeping your information secure. You should still use caution when using a credit card online though, making sure you shop only on secure websites and never on public servers. Always make sure your computer's antivirus software is up to date, too. If you're not sure about a certain website and are worried about payments online, you can always check the Better Business Bureau to find out more information about the company.Prepaid Debit Gift CardPrepaid debit cards work just like regular debit cards, except they aren't linked to your actual bank account. You can purchase a prepaid debit card at most retailers and fill the card with the necessary funds using cash, debit or other payment methods. Many prepaid debit card companies can send you an online statement so you can keep track of your spending. It's a lot safer to use this method because if a hacker was to get any of your information, the only money that would be put in jeopardy is the money on the card and not the money in your bank account.Apple PayApple Pay is a payment method used on Apple products such as the iPhone and iPad. You can use this method in physical stores, on apps and for making secure purchases online. With Apple Pay, you can even learn how to take payments online from other people. One of the benefits of Apple Pay is that you don't even have to download an app to use it -- simply ask Siri. You set up Apple Pay by adding the information of the debit or credit cards you wish to use. Then, when you go to pay for something, you can choose which card gets charged.
